Scott Davenport is a landscape photographer and photo educator based in San Diego, California. He leads photo workshops, hosts podcasts, writes photography books, makes tutorial videos, and feels weird referring to himself in the 3rd person.

He also can't help getting his feet wet photographing at the beach.

You can visit Scott's website at <https://scottdavenportphoto.com> and subscribe on YouTube at <https://youtube.com/ScottDavenport>.

Photo by David Maurer

Foreword

I've been using ON1's software for the better part of a decade, harking back to Perfect Effects 4! Over the years, the ON1 tools have continued to grow. It's no wonder their software remains an integral part of my post-processing workflow.

This book is to help you understand the fundamentals of Photo RAW as well as its advanced features. By the end of this book, you will have the know-how to get the most out of Photo RAW. I have included short exercises to help reinforce the key concepts explained in the book. Practice images are available for download so you can follow along with the examples in the book.

I am also a big believer in teaching *why* to use a tool, slider, or feature. *How* to use a tool is the mechanics, and having powerful tools at our fingertips is good. Knowing *when* and *why* to use a tool unlocks the creative mind. Throughout the book, I make a point to explain why features are useful and in what situations I use them.

A final thought before we dive into Photo RAW ... you, the photographer, makes a great photo. The camera plays its part. The software plays another. Your creativity brings it all together.

Have fun!

– Scott

Practice Images

There are practice exercises throughout the book designed to help you get familiar and comfortable with Photo RAW. A set of RAW photos is available for download so you can follow along step by step with the exercises.

The practice images are RAW files, so they are quite large. You can download them at your leisure from my website.

<https://scottdavenportphoto.com/on1-essentials-updates-2023>

Photo RAW is continually growing. Any corrections and addendums to this edition of the book are available on the URL above.

You may also visit my ON1 Learning Center. I am always posting new videos to my YouTube channel. Many of those videos feature Photo RAW. When I create a new tutorial for Photo RAW, I also add it to the ON1 Learning Center.
